

**ONE CONNXT DELIVERS EMIRATES AUSTRALIAN OPEN BROADCAST TO NORTH AMERICA  
TIGER CLAWS BACK TO FINISH IN THIRD PLACE**

**DALLAS and SINGAPORE – Nov. 15, 2011** –Forty hours of live golfing excitement and Tiger Woods' highest finish in two years was delivered from Asia to North America over the Internet using the ONE CONNXT IP broadcast transport service. The Emirates Australian Open was available live to more than 50 million TVHH's in the U.S. on ONE World Sports and America ONE, and in Canada on The Score and TVA Sports.

ONE CONNXT is a secure, reliable and robust global broadcast quality IP transport service that provides real-time SD/HD content nearly anywhere in the world. ONE CONNXT delivers either point-to-point or point-multi-point locations at a significant cost savings to satellite or fiber.

"The Score and TVA Sports received the Emirates Australian Open live on ONE CONNXT," said Jay Murray, President of JSM Productions, Inc. "This alternative technology provided Canadian viewers with a flawless live, high quality event broadcast of an exciting international golf championship."

"Our broadcast of the Emirates Australian Open live sports event has been successfully received by our large New York television audience on Cablevision and on Verizon FiOS systems," said Ernie Schimizzi, President and GM, WVVH-TV, New York. "Credit goes to America ONE for providing its affiliates with outstanding quality and clarity of programming. America ONE's use of innovative technology such as ONE CONNXT to transport the live action from Australia is cutting edge and provides WVVH an advantage in a highly competitive market."

ONE CONNXT broadcast transport solution delivered the entire 2010 and 2011 OneAsia tour to ONE World Sports' operations center in Fort Worth, Texas. ONE CONNXT transports 1500 hours of programming from Asia, as well as the Aston Villa FC Club Channel from England to the ONE World Sports operations center in Fort Worth. ONE CONNXT, the proprietary technology solution of ONE Media Corp, Inc., recently provided the Tennis Channel's multi-screen broadband distribution of the 2011 French Open. The next golf project for ONE CONNXT is transporting 40 hours of live-golf action from the Coca-Cola Australian PGA Championships (Nov. 23-26, 2011 U.S.) to the U.S.

"ONE CONNXT was built by television people for television distribution," said Paul Dingwitz, CTO of ONE Media Corp, creators of the ONE CONNXT technology and service. "The ONE CONNXT service is secure, flexible and extremely reliable. We have a robust and elastic architecture that provides our customers high quality video and the flexibility they need in the multi-platform universe."
